**Call now to reserve your reservation for this exclusive event! (661) 259-8100**

### **Fall Skincare Tips**

1. Stay Hydrated & Exfoliate to Help Remove Toxins.
2. Switch from Lotion to Cream - Creams are much more hydrating.
3. Protect Your Lips - With The Santa Ana Winds, A Good Lip Balm is Necessary.
4. Don't Forget to Moisturize Your Hands - Cracked Hands are Painful and Unsightly.
5. Use Gentle Soaps that Don't Strip Oils From Your Skin.
6. Continue Sun Protection- Even though the temperatures are decreasing, the sun is still threat #1

## Eliminink Tattoo Removal!

(only star being removed)

(After 2 treatments)

Eliminink is a state of the art tattoo removal system that is more effective and safer than traditional laser tattoo removal. Most patients only need 3 to 5 treatments instead of 8 to 12 treatments with traditional laser tattoo removal. There are less complications, a reduced rate of hyper and hypo-pigmentation and high rate of patient satisfaction.

EliminInk works by removing the ink from underneath the skin; where the tattoo resides. Laser tattoo removal heats the skin to "lighten" the tattoo from the outside in. This results in the skin burning as well as hyper and hypo-pigmentation for many patients. ElimInk offers a much safer and more effective treatment for the reduction of tattoos. Sessions are quick with very little discomfort.

We are proud to be the only medical practice in Southern California offering this revolutionary procedure. We have performed several treatments in the past 30 days and have received 100% positive patient feedback!

If you would like to learn if ElimInk is right for you, give us a call at (661) 259-8100 to schedule a free consultation.
